**Uniformed Services University of the Health Sciences  
School of Medicine  
Department of Preventive Medicine and Biometrics  
Position # AD-0414**

The Department of Preventive Medicine and Biometrics, Division of Tropical Public Health at the Uniformed Services University invites applicants to apply for a tenure track full time faculty position with a 12-month appointment at the level of Assistant Professor.

The Department of Preventive Medicine and Biometrics, one of the nation's largest, is comprised of six postgraduate divisions (Tropical Public Health, Environmental and Occupational Health, Epidemiology and Biostatistics, Health Services Administration, and Behavioral Sciences as well as two medical residency programs (General Preventive Medicine and Environmental and Occupational Medicine). The Department has 50 full-time faculty and over 200 additional adjunct faculty engaged in a wide variety of research projects relevant to public health. The Division and the Department have research relationships with institutions in several locations worldwide, including Department of Defense medical laboratories in Egypt, Indonesia, Kenya, Peru, and Thailand, as well as with the National Institutes of Health and the US Department of Agriculture's Agricultural Research Service. The Division's research includes work on infectious diseases, tropical medicine, and repellent and vaccine development. For more information on the Uniformed Services University visit <http://www.usuhs.mil>.

### **Description of Qualifications** (include required degree/years related experience, etc)

#### *Minimum:*

- a. Doctoral degree in Entomology from an accredited institution.
- b. Applicant will have a demonstrated record of achievement in teaching, research, and service.
- c. Overseas research experience on the arthropod-borne diseases.

#### *Preferred:*

- a. Established record of scholarly research including extramural funding, grant administration and peer-reviewed publications in the subject area of malaria and dengue vectors, vector ecology and vector control
- b. Experience in management of research programs in overseas environments, as well as supervision of foreign workers and coordination of research activities with multiple participating groups

#### Teaching Duties (30% FTE)

The successful candidate is expected to teach courses in medical Zoology, serve as an academic advisor to both master's and doctoral level students and serve on thesis and dissertation committees for students in the School of Medicine.

#### Research Duties (60% FTE)

The successful candidate is expected to conduct independent or collaborative research resulting in peer-reviewed publications in recognized journals; give presentations at state, national, and international meetings; and apply research expertise to teaching and service. The successful candidate is expected to apply for and successfully obtain grants to support original research, with budgets that include stipends for graduate students/research assistants.

#### Other Duties (10% FTE)

The successful candidate is expected to serve on department, school, university committees; and actively participate in local, state, national public health/pest management organizations and professional associations.

Selected candidates will be subject to a security background investigation for employment. If the selectee is unable to meet the requirements of the security background investigation, the tentative offer of employment will be rescinded. If employment has started, the selectee may be discharged.

Closing Dates: Position will remain open until filled. Review of applications will begin September 1, 2009.

Salary and Benefits: Competitive salary (\$59,939 to \$89,908/yr) and excellent benefits.

Application Procedures: Applicant should send (1) letter of interest, (2) curriculum vitae, and (3) the names and contact information for three people who can be contacted as references to:
