

Job Description

*Dow AgroSciences LLC, based in Indianapolis, Indiana, USA, is a top-tier agricultural company that combines the power of science and technology with the "Human Element" to constantly improve what is essential to human progress. Dow AgroSciences provides innovative technologies for crop protection, pest and vegetation management, seeds, traits, and agricultural biotechnology to serve the world's growing population. Global sales for Dow AgroSciences, a wholly owned subsidiary of The Dow Chemical Company, are \$4.5 billion.

Dow AgroSciences R&D is seeking a motivated individual to lead Insectary Operations within the Insect Management Discovery R&D group at our corporate headquarters in Indianapolis, Indiana. The mission of the insectary is to efficiently supply a wide range of high quality insects to research scientists in support of product discovery and development activities. The successful candidate will be responsible for managing a small team tasked with providing a wide range of insectary services including insect production, tissue production, selection for resistance, insect colonization, diet development and production, permitting and shipping.*

Qualifications

- *Bachelor's or MS degree in Entomology or a related biological discipline is required.*
- *Broad experience in insect rearing is highly desired.*
- *Demonstrated ability to work in teams, manage and prioritize activities, to identify and rapidly resolve problems is necessary for success.*
- *Experience with pest management and insecticide development is preferred.*
- *Exceptional communication skills, both written and oral, are essential.*
- *Organizational skills that allow for handling multiple tasks simultaneously are necessary.*
- *Ability to use innovative approaches to meet the needs of customers is critical.*
